

Russian cursive — Ш ш

familylore.ai/script/russian-cursive/letters/shcha

ш, Ш

Watch for

Ш and ш are named together, with И, Л and М, as letters whose cursive forms make some Russian words a challenge, and both draw on the same repeated element. Shape alone will not settle it: work out which reading gives a real word in the sentence, and compare the form against other places in the same document where the writer has used each letter unambiguously.
