

Russian cursive — E e

familylore.ai/script/russian-cursive/letters/ye

e E

Watch for

The description of E states that its shape is very similar to the Latin letter E, and that is the whole of the problem: the outline settles nothing. Work from the surrounding letters and from the language of the document rather than from the letter in front of you. The consequence is mainly one of transcription, since a Russian E is romanized Ye for Russian, as in Европа rendered Yevropa.
