

# Russian cursive — Б б

familylore.ai/script/russian-cursive/letters/be

Б б

**Watch for** The letter shaped like a Latin capital B is Б (Ve), not Б. Ve represents the voiced labiodental fricative /v/, or the voiced bilabial fricative /β/, while Б represents the voiced bilabial plosive /b/ and is the letter romanized with the Latin B. Put plainly: in a Russian document the capital that looks like B is the one that does not sound like B.
