

Russian cursive — Э э

familylore.ai/script/russian-cursive/letters/e

Э Э

Watch for The source states plainly that Э closely resembles the older Cyrillic letter Ukrainian Ye and should not be confused with it. Э is the backwards version of Ё, so the two face opposite ways. They also sit in different alphabets: Э is the letter of Russian, Belarusian and West Polesian, where it carries the vowels [e] and [ɛ].
