

Russian cursive — В в

familylore.ai/script/russian-cursive/letters/ve

в в

Watch for Shape is no guide here. The capital letter Ve looks the same as the capital Latin letter B, but it is pronounced differently: it represents the voiced labiodental fricative /v/, the sound of v in vase, and it is romanized as V under ISO 9. The value to assign is v, whatever the silhouette suggests.
